

"5 (Amended) The spade-pointed coin wrapper of claim 1 wherein ~~[the spade point resembles the worn-down point of an old spade-pointed garden shovel]~~ the wrapper is easily manually conformed around and over the ends of the cylinder shape of a contained stack of coins of the predetermined denomination."

"7. (Amended) The spade-pointed coin wrapper of claim 1 sized to wrap coins of a predetermined denomination ~~[wherein the depth of the edge of the receiving end of the coin wrapper is greater than one thickness of one coin of the predetermined denomination]~~ wherein the spade-point protrudes from a coin-receiving open end thereof more than half of one thickness of one coin of the predetermined denomination.

"8. (Amended) A ~~[The spade-pointed]~~ coin wrapper ~~[of claim 1-sized configured to]~~ for conformally wrapping an enclosed stack of coins of a predetermined denomination and having a protrusion in ~~[wherein the depth of]~~ the edge of ~~[the]~~ a coin-receiving open end thereof ~~[of the coin wrapper is]~~ the protrusion being greater than two one thickness[es] of one coin of the predetermined denomination."

"9. (Amended) The ~~[spade-pointed]~~ coin wrapper of claim 10 ~~[sized to wrap coins of a predetermined denomination]~~ wherein the predetermined denomination is selected from among pennies, nickels, dimes, quarters, 50-cent pieces, and US dollar coins.

"10. (Amended). A coin wrapper comprising:

a tubular body that is adapted to have a substantially circular cross section and being adapted to enclose a plurality of stacked coins of a predetermined denomination;

said coin wrapper having at least one receiving end, wherein the receiving end includes at least one protrusion in the direction of the central axis of the tubular body,

wherein the wrapper is made of a paper-thin material."
